

STF PROFESSIONAL LEARNING

[STF Professional Learning](#) and your professional growth network can work collaboratively to promote and enhance professional learning provided to teachers in Saskatchewan. Why not start a conversation between your network and Professional Learning to further both your and the Federation's vision of professionally led professional learning? Below are possibilities for your professional growth network to consider.

SHARE EXPERTISE TO ENHANCE THE QUALITY OF PROFESSIONAL LEARNING

Professional growth networks excel at understanding instruction, pedagogy and assessment related to their areas. The Saskatchewan Science Teachers Society knows science, Saskatchewan Mathematics Teachers' Society knows math, Saskatchewan School Based Leaders know leadership and Saskatchewan Early Childhood Education Council knows early learning... each professional growth network holds a wealth of knowledge. STF Professional Learning excels at planning and facilitating high-quality professional learning.

PROFESSIONAL LEARNING PARTNERS

STF Professional Learning strives to provide high-quality professional learning opportunities to the teachers of Saskatchewan. STFPL works closely with teachers to plan and facilitate a wide range of supportive and innovative professional growth opportunities.

Many of these [professional learning partners](#) are members of professional growth networks. The hope is to make this connection visible by co-branding workshops planned and facilitated by professional growth network members who are also professional learning partners.

If you are interested in applying to be a professional learning partner, please provide a detailed resume to stf@stf.sk.ca, focusing on areas of interest and any previous facilitation experience you may have.

FACILITATE A VISIONING DAY

The rate of change in education as a whole is incredible. STF Professional Learning can develop a one-day visioning workshop specifically for professional growth networks to support that change. During this workshop board members are able to co-construct roles, create a multi-year plan, prioritize time and people, and identify how to know they are on the right track. This facilitation is available to professional growth networks as a contracted service and can be hosted on a weekend if preferred.

If your professional growth network would like to learn more about these opportunities or if you have any additional ideas as to how Professional Learning and your network might work together, contact:
